Createspace, United States, 2014. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****. Psychology: a Short Account of the Human Mind is essentially an introduction to the study of psychology, and as such must be judged. It is a difficult matter to give a fair idea of what modern psychology is in such brief compass, but the author has performed his task well, on the whole. One feature of the book is much to be commended: it is not a mere catalogue of facts, or digest of the larger works on the subject, but a lucid exposition of the science from the author's point of view. The second chapter, General Conditions of Mental Development, gives in the briefest possible way some of the more significant facts of physiological psychology. It is necessarily somewhat scrappy, but perhaps worth the thirty-five pages devoted to it. The rest of the book is devoted to the subjects usually treated in an elementary psychology. The order of the chapters is not fortunate. After the chapter on Sensation, come those on Laws of Mind, Memory, Reasoning, Perception, etc. This unnecessary separation of the treatment of sensation and that of perception would tend to give the student the impression, not sufficiently guarded against in the chapter on Sensation, that pure sensations are among our actual states of consciousness. It also seems like a curious inversion to treat of reasoning before perception. The same infelicity as to order of exposition is sometimes shown within the chapters, a conspicuous instance of which is the treatment of the association of ideas. In the section entitled Association, in the short chapter on Laws of Mind, association by contiguity alone is described. In the chapter on Memory, however, section on Suggestion,...
