BLACK ROSE BOOKS, Canada, 1999. Paperback. Book Condition: New. 226 x 152 mm. Language: English . Brand New Book. The theme of globalization and the nature of global change provide the context and environment of the book s analysis. Knelman first deals with the nature of science and the behaviour of scientists, using the decision to drop the atom bomb on Hiroshima in 1945 and its lasting legacy, as a case study. He then turns to an analysis of nuclear power, military and civil, and the fatal link between them. A history of environmental thought precedes a shift to the global stage -- the phenomenon of global change and the challenge of global governance. The last chapter describes a model of social sustainability.
