FLUORESCENCE CORRELATION SPECTROSCOPY

Book Condition: New. Publisher/Verlag: Springer, Berlin | Theory and Applications | This is the first book-length treatment of both the theoretical background to fluorescence correlation spectroscopy (FCS) and a variety of applications in various fields of science. The high spatial and temporal resolution of FCS has made it a powerful tool for the analysis of molecular interactions and kinetics, transport properties due to thermal motion, and flow. It contains an essential contribution from Nobel Prize winner M. Eigen, who is...
